Entrepreneurship

## PROFILE SUMMARY

---

From logging 'Hello World' on the console to building an entire website, I have found my calling in Frontend and UI development. I am fluent in React JS and love building applications with it. I have recently diverted my career to software development and seeking a full-time role in a growing team.

## FRONTEND UI/UX PROJECTS

---

### Sorting Visualizer

Implemented React/Redux to build a GUI application which help users to visualize the four common sorting techniques.

### Parallax and Glass Effect

Built multiple websites using only HTML and CSS implementing various styling and animation techniques namely Parallax and Glass effect.

### E-Commerce Store

Built an end-to-end e-commerce website with real-time experience using React.JS. Used Gatsby for the storefront, stripe for payment, Netlify for handling checkout process and Algolia for product searching.

## PREVIOUS POSITIONS

---

### Freelance Web Designer

Apr 2020 – Present | Remote

- Built over 20 Wordpress functional websites for clients within a year and rendered maintenance to all of them. The websites are mainly built using Elementor tool.

### Freelance Content Creator

Jun 2018 – Present | Bangalore, Remote
